# *1 and Fish Egg Distribution Report*

## OF THE NATIONAL FISH HATCHERY SYSTEM

Report Number 21

UNITED STATES DEPARTMENT OF THE INTERIOR  
FISH AND WILDLIFE SERVICE

As the Nation's principal conservation agency, the Department of the Interior has responsibility for most of our nationally owned public lands and natural resources. This includes fostering the wisest use of our land and water resources, protecting our fish and wildlife, preserving the environmental and cultural values of our national parks and historical places, and providing for the enjoyment of life through outdoor recreation. The Department assesses our energy and mineral resources and works to assure that their development is in the best interests of all our people. The Department also has a major responsibility for American Indian reservation communities and for people who live in island territories under U.S. administration.

## INTRODUCTION

Federal responsibilities for stewardship of the Nation's diverse and valuable fishery resources date from 1871 when Congress established the position of Commissioner of Fish and Fisheries in response to concerns about the decline in domestic food fish supplies. In 1872, Congress appropriated funds for the first national fish hatchery - a spawning and egg collecting station on the McCloud River in California. During its early years, the National Fish Hatchery System was the principal management tool available for addressing fishery resource problems. However, changing resource needs, involving management philosophies, growth of the science and technology of fishery management, development of State capabilities, and legislative actions have significantly altered fishery resource management and the role of the National Fish Hatchery System.

Fishery-related activities of the Fish and Wildlife Service (Service) were re-evaluated in the early 1980s which resulted in the definition of the following four areas for which the Service has or shares responsibility:

1. Facilitate restoration of depleted, nationally significant fishery resources;
2. seek and provide for mitigation of fishery resource impairment due to Federal water-related development;
3. assist with the management of fishery resources on Federal (primarily Service) and Indian lands; and
4. maintain a Federal leadership role in scientifically-based management of national fishery resources.

Consequently, fish culture facilities that had produced fish for enhancement purposes were redirected to address the four areas of responsibility listed above.

In order to meet these responsibilities in Fiscal Year 1986, the Service operated 90 fish production and support facilities that comprise the National Fish Hatchery System (see pages 53 through 58). Seventy-three of these units are solely fish production units, 3 of which are also classified as National Broodstock Hatcheries. In addition to the 73 production units, the Service operates 5 fish technology centers (4 of which have production responsibilities), 10 fish health centers/offices, 1 fishway facility, and 1 fish screen facility as part of the National Fish Hatchery System.

This report summarizes the distribution of fish and fish eggs reared by the National Fish Hatchery System for the period October 1, 1985, through September 30, 1986.

FISH AND FISH EGG DISTRIBUTION TABLES

TABLE 1. FISH EGG DISTRIBUTION BY  
REGION, NATIONAL FISH HATCHERY, AND SPECIES

| REGION, NATIONAL FISH<br>HATCHERY, AND SPECIES | NUMBER<br>OF EGGS |
|--|-------------------|
| <u>REGION 1</u>                                |                   |
| ABERNATHY STC, WA                              |                   |
| -FALL CHINOOK SALMON                           | 1,760,000         |
| TOTAL HATCHERY DISTRIBUTION                    | 1,760,000         |
| CARSON NFH, WA                                 |                   |
| -SPRING CHINOOK SALMON                         | 4,178,500         |
| TOTAL HATCHERY DISTRIBUTION                    | 4,178,500         |
| COLEMAN NFH, CA                                |                   |
| -FALL CHINOOK SALMON                           | 10,000            |
| -STEELHEAD                                     | 972,072           |
| TOTAL HATCHERY DISTRIBUTION                    | 982,072           |

## SPECIES DISTRIBUTED

The following list represents the general groups and scientific names of fishes produced and distributed to meet fisheries activity responsibilities. The nomenclature used is that established in the American Fisheries Society Special Publication Number 6 (1970), A List of Common and Scientific Names of Fishes from the United States and Canada.

| MAJOR GROUP AND COMMON NAME | SCIENTIFIC NAME |
|-----------------------------|-----------------|
|-----------------------------|-----------------|

Coldwater (Anadromous)

|                           |  |
|---------------------------|--|
| ATLANTIC SALMON . . . . . | <u>Salmo</u> <u>salar</u>              |
| CHINOOK SALMON . . . . .  | <u>Oncorhynchus</u> <u>tshawytscha</u> |
| CHUM SALMON . . . . .     | <u>Oncorhynchus</u> <u>keta</u>        |
| COHO SALMON . . . . .     | <u>Oncorhynchus</u> <u>kisutch</u>     |
| STEELHEAD . . . . .       | <u>Salmo</u> <u>gairdneri</u>          |

Coldwater (Non-Anadromous)

|                               |  |
|-------------------------------|--|
| ATLANTIC SALMON . . . . .     | <u>Salmo</u> <u>salar</u>                  |
| ARTIC GRAYLING . . . . .      | <u>Tymallus</u> <u>articus</u>             |
| BROOK TROUT . . . . .         | <u>Salvelinus</u> <u>fontinalis</u>        |
| BROWN TROUT . . . . .         | <u>Salmo</u> <u>trutta</u>                 |

## GLOSSARY

ANADROMOUS FISH - A marine fish such as Pacific or Atlantic salmon, Striped bass, and steelhead that migrate upstream into fresh water to spawn.

COLDWATER SPECIES - Generally, fish that spawn in water temperatures below 55° F. The main cultural species are trout and salmon.

COOPERATIVE STATE REARING - Fish provided thru Federal and State joint cooperation as a result of legislation, agreement, judicial directive, or other mandate.

COOLWATER SPECIES - Generally, fish that spawn in temperatures between 40° and 60° F. Main cultural coolwater species are northern pike, muskellunge, walleye, sauger, and yellow perch.

DISTRIBUTION - The release or transport of fish or fish eggs to the wild or non- U.S Fish and Wildlife National Fish Hatcheries for further fish rearing.

ENDANGERED SPECIES - Species of fish listed as either endangered or threatened under the U. S. Endangered Species Act of May 1977.

INLAND - Non - anadromous.

SHIPMENT - The release or transport of fish or fish eggs from a National Fish Hatchery, which includes both fish or fish egg distribution and transfers.

TRANSFER - The shipment of fish between National Fish Hatcheries for further fish rearing or distribution.

WARMWATER SPECIES - Generally, fish that spawn at temperatures above 60°F. The chief cultured warmwater species are basses, sunfish, catfish, and minnows.
